

VitaGen Next Phase Offer

Prepared for Thomas / Syntext

Prepared by Deni

June 13, 2026

UI/UX, Print, Payment Workflow, and Optional AI CV Assistant

Scope interpretation: this offer covers the VitaGen generator product, not a full redesign of the main syntext.ch website. The focus is the VitaGen landing page, the Motivationsschreiben generator, the Lebenslauf generator, document styles, print preview, and the buy/download workflow.

Option 1 - VitaGen Core Upgrade

\$500 fixed price

Estimated delivery: 7 days

- Modernize the VitaGen landing page and generator forms.
- Improve the UI/UX for both Motivationsschreiben and Lebenslauf.
- Improve all 14 existing document styles so they look cleaner and more professional.
- Stabilize print preview for Motivation Letter and CV documents.
- Keep the free preview with watermark.
- Make the buy button functional.
- Integrate Stripe Checkout.
- Create the paid download flow for a PDF without watermark.
- Keep API/payment secrets server-side.
- Test the complete flow on Hosttech and Railway.

Option 2 - VitaGen Pro + AI CV Assistant

RECOMMENDED

\$650 fixed price

Estimated delivery: 10 days

This includes everything from Option 1, plus an AI assistant for the CV generator.

- CV score / quality check.
- Improvement suggestions for missing or weak sections.
- AI-assisted rewriting based on professional German CV writing patterns.
- More professional wording for experience, education, skills, and profile sections.
- Reuse of the existing AI photo system for the CV photo where applicable.

Important Notes

Payment methods such as card, Klarna, or TWINT depend on which payment methods are available and enabled in the client's Stripe account.

This estimate does not include a full redesign of the main syntext.ch website, advanced admin dashboards, subscriptions, invoice systems, custom accounting logic, or legal/tax consulting.

Recommendation

I recommend Option 2 because the AI CV assistant would make VitaGen feel more complete and more valuable for users, while still keeping the scope realistic and focused.

This offer is based on the current VitaGen generator structure and the already completed AI function deployment. Final implementation details may be adjusted after reviewing Stripe account settings and the exact production payment requirements.
