CV

PROFILE

- A highly motivated Full-Stack Developer focused on building modern mobile and web applications. Experienced in designing responsive user interfaces and scalable backend architectures. Passionate about integrating artificial intelligence technologies into practical applications.

WORK EXPERIENCE

- Full-Stack Developer**
TechNova Solutions / Bandung, Indonesia | January 2024 - Present
Developed and maintained web and mobile applications using Flutter and Next.js. Integrated backend services and databases using Supabase to ensure efficient data management. Collaborated with the design team to implement minimalist and user-friendly UI/UX. Managed the application release cycle and version control using GitHub and cloud hosting platforms like Vercel.
- Junior Web Developer**
Kreatif Studio / Jakarta, Indonesia (Remote) | June 2022 - December 2024
Assisted in building e-commerce applications and corporate websites for clients. Performed debugging, website performance optimization, and user interface improvements.

EDUCATION

- Bachelor of Computer Science (B.Comp) - Informatics Engineering. GPA: 3.85/4.00. Final Project: "Web-Based Integrated Task Management System".**
Harapan Institute of Technology | Bandung / Indonesia | August 2018 - July 2022

FURTHER TRAINING

- Advanced Flutter & Dart Development**
Dicoding Academy / Online | August 2023 - August 2024
State management (Provider, Riverpod), REST API integration, clean code architecture, and app release preparation for Play Store/App Store.
- Google Cloud Fundamentals: Core Infrastructure**
Google Coursera / Online | February 2023 - February 2024
Basic understanding of cloud infrastructure, virtual machine management, and application deployment.
